

## INFO-TECH n. 1/21 - September 2nd - 2021

***Sbj.: Ignition plant engines 60cc (Mini Pro-M/X30 Water Swift)***

Dear all,

we wish to inform that starting 2022, we will introduce a new version of the wiring loom on 60cc engines of the series Mini Pro-M and X30 Water Swift.

The new wiring loom will replace the current one and will include the following:

- IFE-05401D: starter motor cable
- IFE-05004: cables harness
- IAE-06100: adapter ignition 2 poles
- IFI-70101: security bracket
- IFI-70001: buttons bracket
- IFE-05003-PS: start button
  
- IFE-05003-PR: stop button

Kindly refer to the following pages for visual details.

The current wiring loom plant will be still valid and the two plants are fully interchangeable.

The new components don't affect the performance of the engines in any way.

Updated homologation forms will be disclosed towards the end of 2021.

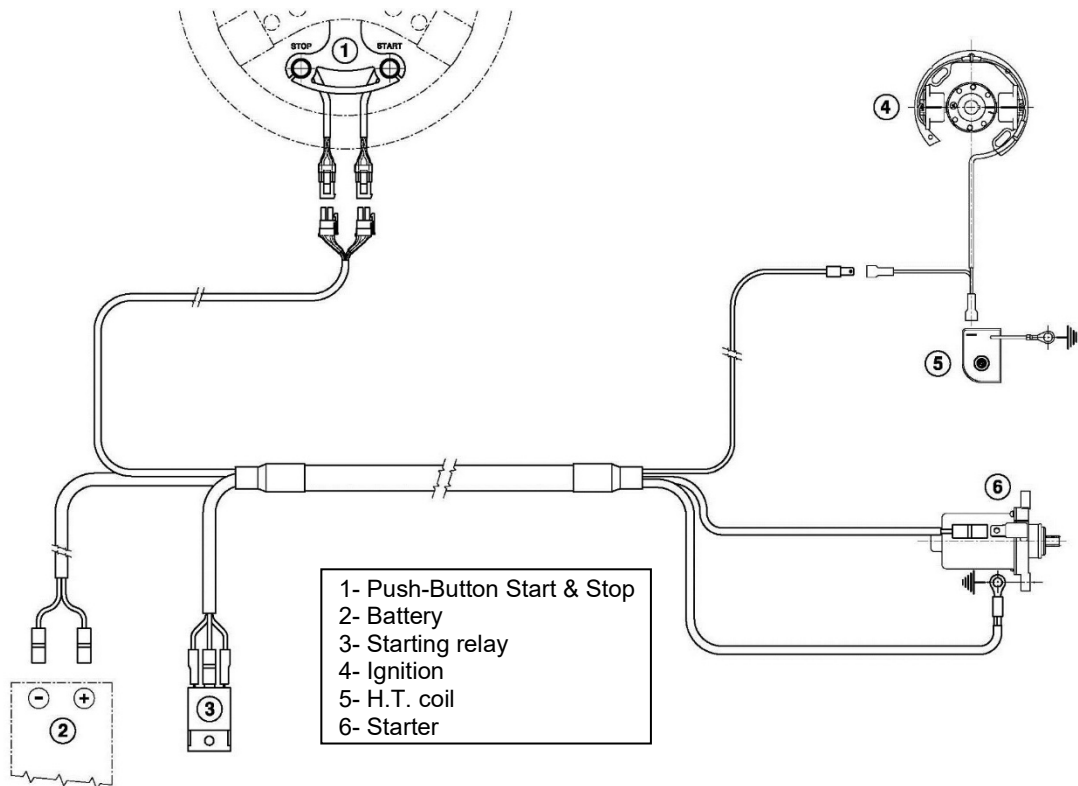

We are available for any further information you may need and we take the opportunity to send our best regards,

IAME S.p.A.S.U.
